

HeatQ TECHNOLOGY

HeatQ Technology is a company with the Polish capital, which specializes in the production and distribution of innovative solutions for the heating industry.

We produce microprocessor-operated heating elements to towel warmers, electric towel rails and automatic systems for the heating branch.

We also offer OEM/ ODM service.

Our company was founded in 2010 in Gdansk (North of Poland). First part of our products was launched to the market in January 2013. Currently, on the area 500 m² have been produced approx. 15 000 products per year but the production capacity is 100 000 products per year. More than 95% sales of our products focused on exports. The main export markets are: Czech Republic, Slovakia, Hungary, Sweden, Lithuania, Turkey.

Creative passion and experience in the design, and manufacturing has led us to the formation of the company, which implements our intentions and requirements of our Customers.
